

SKYWELL® 5T1.5 CERTIFICATIONS

FEDERAL COMMUNICATIONS COMMISSION

The Skywell 5T1.5 has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

UNDERWRITERS LABORATORIES

The Skywell 5T1.5 has been tested by UL and found to be in compliance with applicable requirements of an atmospheric water cooler.

IAPMO CERTIFICATION TO NSF STANDARDS

The Skywell 5T1.5 has been tested and certified to the following NSF standards:

NSF/ANSI 42

Standard 42 establishes the minimum requirements for the certification of filtration systems regarding specific water aesthetic qualities (chlorine, taste, odor, particulates) that may be present in public or private drinking water.

NSF/ANSI 53

Standard 53 establishes minimum requirements for material safety, structural integrity, product literature and health related contaminant reduction performance claims.

NSF/ANSI 61

Standard 61 establishes stringent requirements for the quality and performance of equipment that comes in contact with either potable water or products that support the production of potable water.

NSF/ANSI 372

NSF 372 establishes the guidelines for the evaluation of the lead content in drinking water.

NSF/ANSI 55 Class "A"

Standard 55 establishes minimum requirements for the reduction of microorganisms using ultraviolet radiation (UV). The Class "A" certification relates to establishing acceptable levels of daily disinfectant of UV doses.
