

It's simple. It's efficient. It's revolutionary. The Skywell 100

How it works

Just plug it in. The Skywell 100 takes in ambient air, and through a proprietary condensation process it collects moisture, then meticulously filters it to remove impurities.

Why it's better

No rusty pipes. No delivery trucks. No plastic bottles. The Skywell 100P reliably delivers up to 100 gallons per day of clean, pure water.

Model code	SKYWELL 100
Power rating	AC230V 60Hz/30Amps peak draw 50 Amps
Power	2.8 kW
Water temperature	Ambient temp
Internal storage cap	100 gallons
Min humidity	>30% RH
Weight	964 lbs.
(HxWxD)	40" x 48" x 83"
